

FREQUENTLY ASKED QUESTIONS

Quickflows.ai

Common questions from CIOs, CCOs, CFOs, and compliance teams evaluating Quickflows for workforce and financial operations automation.

IMPLEMENTATION & SETUP

1. How long does it actually take to go from signed contract to agents running live?
2. Do we need to replace our existing systems — scheduling software, EHR, billing platform?
3. Do we need an internal IT team or consultants to get started?
4. What does the onboarding process look like, step by step?

CONTROL & ACCOUNTABILITY

1. What decisions can agents make autonomously, and what gets escalated to a human?
2. If an agent makes a wrong decision, what happens and who is accountable?
3. Can we configure the rules the agents operate within?
4. Can we pause or turn off individual agents without disrupting others?
5. Is there a full audit trail of every decision an agent makes?

SECURITY & COMPLIANCE

1. Where is our operational data stored, and who can access it?
2. How is data handled at the end of a contract?
3. Does Quickflows use our operational data to train models?

PRICING & COMMERCIAL

1. How is Quickflows priced — per agent, per seat, or by operational volume?
2. Is there a minimum contract commitment?
3. What does implementation and onboarding cost?
4. Can we start with one vertical and expand later?

TECHNICAL FIT

1. What happens if our data quality or historical records are incomplete?
2. Can the agents learn our specific policies and compliance rules, or do they use generic templates?
3. What happens if our primary systems go down?

BEFORE YOU COMMIT

1. Can we see agents running in scenarios specific to our operations before signing?
2. Do you work with organisations at our size and scale?
3. What does a typical first 30 days look like for a new customer?
4. Will this replace our coordinators, AR team, or admin staff?

Note — The question 'Will this replace our coordinators, AR team, or admin staff?' should be answered prominently on the site itself, not just in the FAQ. It is in the room every time. Answering it honestly and proactively is a significant trust signal for a C-suite audience.
